Product Specifications

Product Name: Turkmen Raw Mulberry Silk No 429
HS Code: 5002 – Raw Silk/Mulberry Silk
Country of Origin: Turkmenistan
Supplier: Continental Exchange LLC, Dubai, UAE.

1. Product Description

Raw Mulberry Silk No. 429 from Turkmenistan is a premium grade natural filament fiber produced by the Bombyx Mori silkworm. This silk is known for its exceptional luster, smooth texture, and superior tensile strength. Turkmenistan's unique climate and traditional sericulture practices ensure that this silk maintain consistent fiber fineness, natural whiteness, and superior reeling quality, suitable for luxury textile and fabric applications.

2. Technical Specifications

HS Code: 5002 / 50020010
Silk Type: Mulberry Silk (Raw, Reeled)
Grade: No. 429
Denier: 20-22 D (average)
Color: Natural White to Creamy Off-White
Moisture Content: Max 11%
Tensile Strength: Min 4.0 g/d
Elongation at Break: 15-20%
Impurity Level: Max 0.5%
Luster: High Natural Gloss
Odor: Natural (no chemicals added)
